

LiveModel

Bring Your Business Processes to Life

LiveModel is a state-of-the-art environment for designing, evaluating and optimizing the processes that power your business. Using an intuitive graphical user interface, LiveModel provides a complete representation of your business, from organization structure, through processes and roles, to the software transactions that automate your business processes. Ease of installation, cloud architecture and minimal training enable users around the world to quickly take control of and utilize business process assets.

Projects and SAP Operations

Business Process Modeling

Create, modify, view and compare models that represent your business processes.

Document SAP Processes

Automatically reverse engineer live SAP systems to discover the supported business processes.

Populate SAP Solution Manager

Populate and scope an SAP Solution Manager business process blueprint and automatically associate transaction customizing activities.

HP Quality Center Integration

Integrate with both HPQC and SAP for efficient and effective management of business processes, test requirements and test plans. Get a clear picture of the testing process, highlighting end-to-end, integrated business processes.

Audit Business Processes

Reduce risk to the business by ensuring complete visibility and consistency over business processes.

- ✓ Easy to use, intuitive modeling tool
- ✓ Eliminate manual input and manual analysis
- ✓ Seamless integration with HP Quality Center
- ✓ Better manage risk and improve regulatory and SOX compliance
- ✓ Support new business functionality
- ✓ Live data ensures 100% accuracy
- ✓ Easy maintenance through automated updates

Implementation

LiveModel is quick and easy to set up. It takes less than one hour to install and you do not need training or additional consulting. LiveModel is a web-based tool and can be accessed through a web browser anywhere, anytime.

Minimal infrastructure is needed to support LiveModel:

- 64-bit Windows
- 8 GB RAM
- 100 GB Free Disk Space
- IIS

Continuously Monitor Business Processes

Ensure business processes are up to date and reflect actual SAP system use.

Upgrade and Consolidation Project Management

Understand the impact of an upgrade or consolidation on existing business processes by keeping business process documentation up to date.

Manage Global vs. Local Business Processes

Understand how business processes are used across global, multi-site SAP installations.

Why do Customers Use LiveModel?

- **Total SAP Lifecycle Support:** Focused exclusively on SAP, LiveModel supports the whole SAP lifecycle, from audit to upgrade, support pack to daily changes.
- **Ease of Use:** LiveModel is easy to set up and easy to use. Training lasts one day.
- **Smart Integrations:** LiveModel integrates with other applications, including HPQC, SharePoint and SAP Solution Manager, to provide complete visibility of your business processes.
- **Saves Time:** LiveModel synchronizes content automatically to reflect SAP change. Use LiveModel alongside LiveCompare to automatically identify which test scripts will be impacted. Quickly implement a risk-based approach testing methodology.
- **Everyone Benefits:** From C-level executives to Business Process Owners; from Security Managers to QA Managers, LiveModel delivers value to stakeholders across the whole business.
